

3d Models & Content

3D Models

High-fidelity, Real-time 3D Models

High-fidelity 3D Models

BlueHalo is a recognized leader in customized 3D content, multi-platform integration within all areas of simulation, Interactive Multimedia Instruction (IMI), and serious gaming..

Setting the standards in simulation gaming as the go-to producer of 3D model content for large 3D content programs including:

- Primary provider of 3D database models, and exclusive developer of Common Moving Models
- (CM2) for the Synthetic Environment Core CVEM (SE Core CVEM) Program
- Prime contractor on the Army Game Studio (AGS) 3D modeling contract producing AAA game quality 3D vehicle models that will ultimately be distributed on the MilGaming website for use throughout the Department of Defense (DoD) for easy integration into UE4 and other simulation game engines
- Prime contractor on the Dutch Ministry of Defence 3D modeling program

3D SOLUTIONS

- Extensive library of pre-built 3D Models
- Tiered fidelity classes
- Integrates into any engine
- Worldwide leader in customized 3D model development

World Class 3D Models set to three fidelity Classes

Gold

Our highest fidelity "AAA" game quality 3d Models

Silver

Designed for simulation-gaming, virtual and augmented reality

Bronze

Low polygon 3D models designed for simulation training
