

VAMPIRE[®] BAT

Bi-directional Advanced Trainer

VAMPIRE[®] BAT Bi-directional Advanced Trainer

Attributes

Vampire[®] BAT is an embedded trainer that runs on fielded One System Remote Viewing Terminal (OSRVT) hardware and trains operators on basic OSRVT operations as well as bi-directional capability of system. It simulates operator interaction with UAV without requirement for live flight and uses geo-specific terrain and tactical vignettes to train operators in advanced OSRVT operations. Also includes embedded training videos and Interactive Multimedia Instruction.

Features

- Embedded simulation trainer for One System Remote Video Terminal (OSRVT) operator training
- Includes Computer Based Training (CBT) modules for basic operations refresher training
- Incorporates checks on learning to ensure operator understanding of system operations
